

Dear Director of the Government Accounting Standards Board,

I am writing to request that you utilize and direct your talents, abilities and authority to support and implement transparency and full disclosure of all state and local subsidies to businesses, their recipients and their brokers fully identified, in addition to any fees paid, any campaign contributions by the companies and brokers, as well as a comprehensive accounting of the number of jobs added, if any, covering the entire period of each transaction as well as annual documentation and reports.

Thank you in advance for your part in identifying and eliminating unjust practices that enable corporations, businesses, companies and brokers to wield unfair advantage and unjust influence over people and/or the environment, and to uphold the people's best interests regarding health, security, financial stability, access to information and opportunity for equal rights.

I trust that you may understand the importance of this undertaking and will take on the mantle to investigate, restore and sustain the balance of justice.

Sincerely,

Sheree Kaslikowski
