Subject: Project 19-20E

I have just read David Cay Johnston's article in Al-Jazerra dated 12-12-2014, titled "A ray of sunlight on secretive corporate welfare".

I strongly agree that the idea of making tax abatements public knowledge is a great first step.

I also agree with Mr. Johnston that state and local subsidies to businesses should be made available.

For me it comes down to the fact that we all need to contribute, thank you.
