Subject: Corporate Welfare

Dear Sir/Ma'am,

I just finished reading an Al Jazeera America story about corporate welfare, and I'm a bit astonished at the impact this has on the average tax payer. I've heard of corporate welfare before, but never really understood the concept until reading this article. My wife and I pay our share of taxes, and look with disgust at the impact they have on our paychecks. Knowing that a portion of that money is siphoned off to assist multi-million dollar corporations is a severe slap in the face that I would love to have remedied. I'm hoping you can end this system as soon as possible, and create a new environment where corporations actually pay their fair share.

Sincerely,

Gary D. Gidak
