Subject: Re: Project 19-20E Tax abatement disclosures

I do not feel this proposed rule goes far enough to disclose the rampant corporate welfare in this country. I want to see in detail any tax abatement for the entire length of the abatement period, what they are getting in return for the government perk they receive, and most importantly, what other private or political donations or perks they have given in return.

ALL companies receiving tax perks should be named, including the parent companies and executive leadership, and a dollar for dollar accounting made. Too many federal, state and local governments are being badly ripped off by these thugs.

For instance, I want to know what Walmart is giving back to the communities they are getting huge tax breaks from. I want to see who and what entities WalMart is funding in return.

Shine a very bright light on these modern day pirates.
